ALLOWANCE

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: in regards to instant independent claims 20 and 29, the closest prior art of Lee et al. (US 6,419,769) in view of Schmid et al. (US 5,178,686) does not teach a method for the production of a high strength material comprising producing a block of aluminum-based base alloy where the base alloy includes an amount of silicon, magnesium, and copper as recited in instant claims 20 and 29 along with 0.5 to 1.5 wt% magnesium phosphate to increase the grain fineness of primary magnesium silicide in the base alloy. The prior art does not disclose that the high strength material comprises any magnesium phosphate and therefore it would not have been obvious to one of ordinary skill in the art to add magnesium phosphate to the high strength material of Lee in view of Schmid.

Regarding instant independent claim 31, the closest prior art of Adam et al. (US 4,917,739) does not disclose an aluminum-based alloy with a composition recited in instant claim 31 along with 50 ppm beryllium. The Examiner's initial position regarding the claimed beryllium content was that the Examiner assumes that an impurity level of 50 ppm beryllium in the aluminum alloy would not have an effect on the properties of the claimed aluminum alloy and therefore one of ordinary skill in the art would have expected the alloy of Adam to have properties similar to the properties of the instant claimed alloy. However, Applicant submitted an excerpt from Kaufman, J.G., *Aluminum Alloy Castings*, p. 15, ASM International (2004), that discloses that additions of a few parts per million beryllium can be effective in reducing oxidation losses and associated

inclusions in magnesium-containing aluminum alloy compositions. Therefore, one of ordinary skill in the art would *not* have expected the alloy of Adam to have properties similar to the properties of the instant claimed alloy and therefore the instant claimed product of claim 31 is patentably distinct from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
